WELL TESTING

WELL TESTING

Express is a market leader in well testing operations across the United States providing a diversified selection of well testing services to the petroleum industry. Whether your needs are short-term flow back or permanent production facilities, our well testing operations are designed to remove damaging drilling fluids, completion fluids and initial well production prior to attaching the well to permanent production facilities.

WELL TESTING

Express' current well testing services offerings include:

Well Testing Services:

- ▶ Production Well Testing
- ▶ Exploratory Well Testing
- ▶ Frac Flow Back
- ▶ Production Monitoring
- ▶ Data Acquisition

Early Production Facilities (EPF):

Express also specializes in manufacturing early production facilities and extended well testing operations

- ▶ EPF's allow operators to begin immediate return on investment
- ▶ EPF's allow operators to get wells on production in a more timely manner
- ▶ Permitting is streamlined
- ▶ Long term data acquisition and analysis assist operators' long term planning for permanent operations

Well Testing Equipment:

Our Commitment to safety and the latest technology will ensure operators' objectives and requirements are met

- ▶ Express' equipment is accredited by the American Society of Mechanical Engineers (ASME) and our equipment is documented and code certified
- ▶ Express' equipment measures the well's flow rates, oil, gas, and water composition
- ▶ Data can be captured electronically and allows for electronic transmission for secure VPN client viewing access
- ▶ Technical specifications meet or exceed API 6A specs
- ▶ Most of our equipment is trailer-mounted for easy mobility
